

ETC Cypherpunks Whitepaper

Version 1.0 – 20 April 2025

“Code is our weapon. Immutability is our shield.”

💀 Introduction

ETC Cypherpunks is a groundbreaking NFT ecosystem, purpose-built for Ethereum Classic (ETC). Bridging cutting-edge digital art with real-world utility and Web3 gaming, ETC Cypherpunks isn't just another NFT collection—it's a fully decentralized experience designed for longevity, ownership, and innovation.

In a blockchain world cluttered with copycats, we stand apart:

- Fully on-chain art and metadata, permanently inscribed on ETC.
- Deflationary economic model: Every transaction burns Cypher tokens.
- Interactive utility: Monthly token rewards and immersive Web3 gaming.

Welcome to the future of blockchain collectibles.

🛠️ Key Features

🔒 Fully Immutable NFTs

All artwork, traits, and metadata are permanently stored directly on-chain. Your assets remain secure and unchanged, forever.

🔥 Deflationary Mechanics

Minting burns ETCPOW tokens, steadily decreasing their supply and enhancing value.

📘 AI-Generated Lore

Unique, compelling backstories enrich each NFT, enhancing storytelling, engagement, and the community experience.

💰 Monthly Rewards

Holding NFTs earns you CYPHER (\$CYPH) tokens each month, rewarding loyal collectors consistently.

🎮 Integrated Gaming

NFTs are not mere collectibles; they're playable characters in an expanding universe of retro-style Web3 games.

THE CYPHERPUNKS NFT COLLECTION

The ETC Cypherpunks collection consists of 10,000 NFTs with detailed, AI-generated lore backstories. Each Cypherpunk avatar is unique, cyberpunk-inspired, and dynamic. Your NFT isn't just a collectible—it's your gateway to rewards, upgrades, and immersive gaming experiences.

Each NFT carries two special values:

Rarity Score: Determined by the uniqueness of your NFT's traits.

Cypher Score: Determines your monthly token rewards and strength in Web3 games.

MYTHIC UPGRADES: EVOLVE YOUR CYPHERPUNK

Once 50% of the main collection (4,950 NFTs) has been minted, the exclusive Mythic Upgrade pathway opens. Mythic NFTs represent the highest tier in the ETC Cypherpunks universe.

To obtain a Mythic NFT:

1.Own a high ranking Cypherpunk with a Cypher score of 10 or above

2.Burn 3 Energy Gems and pay a small fee, or

burn 1 Cypher Gem and pay a small fee.

Your original NFT and the gems used will be permanently burned, reducing supply and increasing scarcity.

Only 100 Mythic NFTs can ever exist—claim your spot among the elite.

Supply = 250

Supply = 100

Supply = 100

CYPHER TOKEN (\$CYPH)

The CYPHER token is the lifeblood of the ETC Cypherpunks ecosystem. Register and hold NFTs and earn CYPH—automatically, without staking.

Total Supply: 250,000,000 CYPH

40% of supply used for liquidity

40% reserved exclusively for monthly NFT holder rewards

20% for community growth, competitions, and exchange listings

No presale. No private investors. A fair, community-driven distribution model.

Dynamic Transaction Burn:

CYPHER token incorporates an adjustable burn fee on every token transaction. This burn fee can be dynamically updated or disabled, allowing optimal management of deflationary economics, token usability, and sustainable market growth. This built-in burn mechanism continually reduces total supply, supporting long-term token scarcity and value appreciation.

WEB3 GAMING ECOSYSTEM

Your Cypherpunk NFT isn't just art—it's your digital identity in our evolving Web3 gaming universe. Play games, earn CYPH tokens, and become part of the next generation of retro-inspired blockchain gaming.

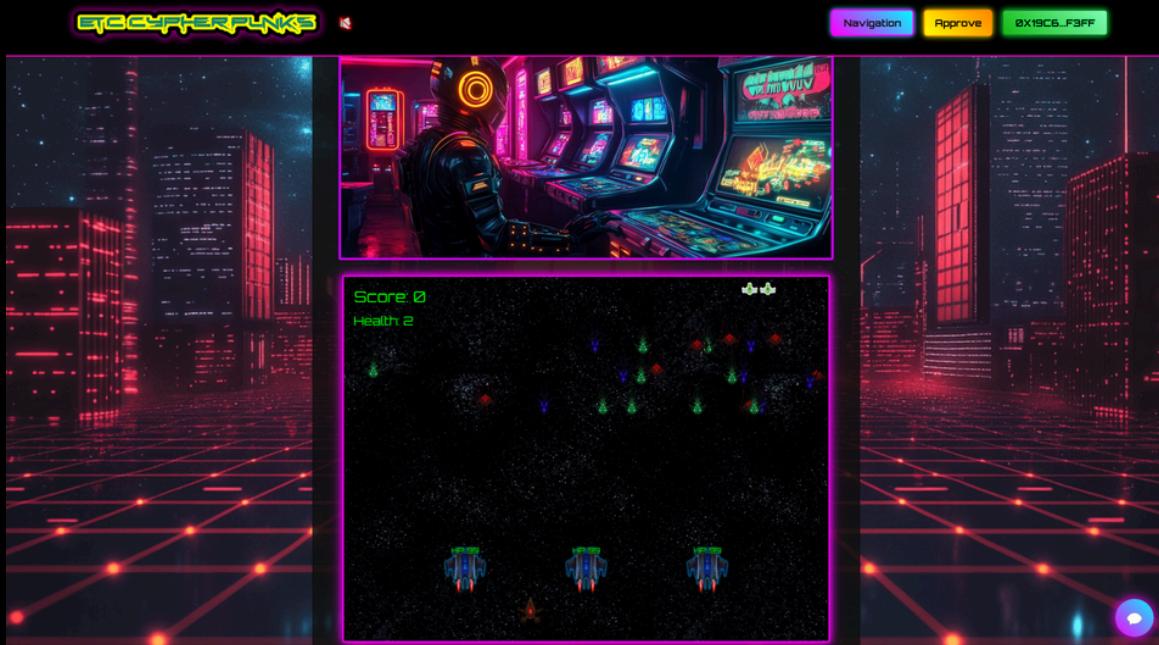

Current Game – Cypher Invaders

Our first release is Cypher Invaders, a fully on-chain, retro-inspired 2D space shooter. Battle waves of cyber-aliens, earn CYPH rewards by achieving high scores, and complete exciting community challenges to win even more tokens.

Upcoming Games & Future Vision

Following Cypher Invaders, we'll introduce classic arcade-style experiences like Pac-Man-inspired games and other retro favorites. The long-term vision is to launch a full-featured retro fighting game where your NFT avatar becomes the central character you control—complete with personalized traits and Cypher Score-based abilities.

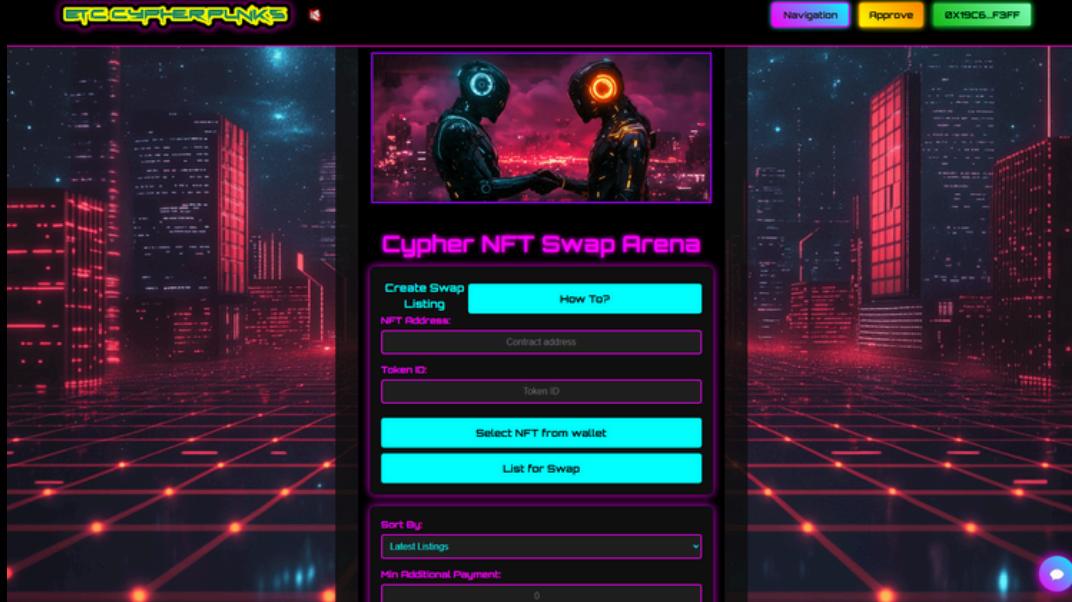

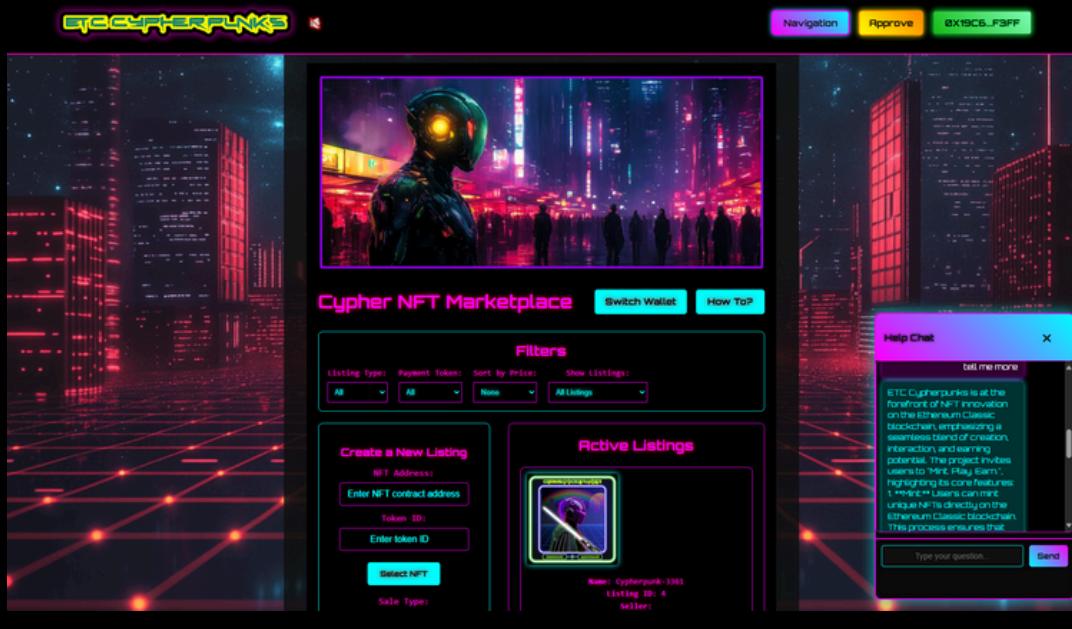

Play. Earn. Compete. Your Cypherpunk journey is just beginning.

MARKETPLACE & SWAP ARENA

Trade, buy, or swap NFTs safely and instantly.

- Buy Now: Purchase NFTs instantly with ETC or ETCPOW
- Auctions: Participate in timed auctions with built-in anti-snipe protection.
- NFT Swap Arena: Trade NFTs peer-to-peer effortlessly.

IMMUTABILITY & DECENTRALIZATION

Our project is built to last. NFTs are fully decentralized, with metadata and images stored permanently on-chain. ETC Cypherpunks contracts are immutable, fully verified, and final. True decentralization isn't negotiable—it's guaranteed.

CYPHER HODL: EARN EXTRA REWARDS ON-CHAIN

Maximize your CYPH token earnings with Cypher Hodl, our fully on-chain rewards system designed exclusively for dedicated holders.

Simply lock (hodl) your CYPH tokens directly on-chain for a period you choose, and instantly boost your rewards:

Earn additional CYPH tokens just for hodling.

Flexible timeframes: shorter locks for modest rewards, or longer locks for maximum returns.

Fully decentralized, transparent, and secure on Ethereum Classic.

Holding has never been more rewarding. Commit, hodl, and watch your Cypher rewards grow.

A screenshot of the Cypher Hodl interface. At the top, there's a navigation bar with "Navigation", "Approve", and a green button labeled "2X19C6_F3FF". Below the navigation is a "Welcome to Cypher Hodl" section with the text "Earn rewards by hodling your cypher" and "Connected 0x19C6_F3FF". A "How To?" button leads to a form where users can input their "Hodl Amount" (Enter token amount), "Select Hodl Period" (1 months - 2%), and an "Optional Nickname" (Enter nickname (or leave blank)). There are also "HODL TOKENS" and "View Your Hodl's" buttons. The background features a dark, futuristic cityscape with glowing red lights and a grid pattern.

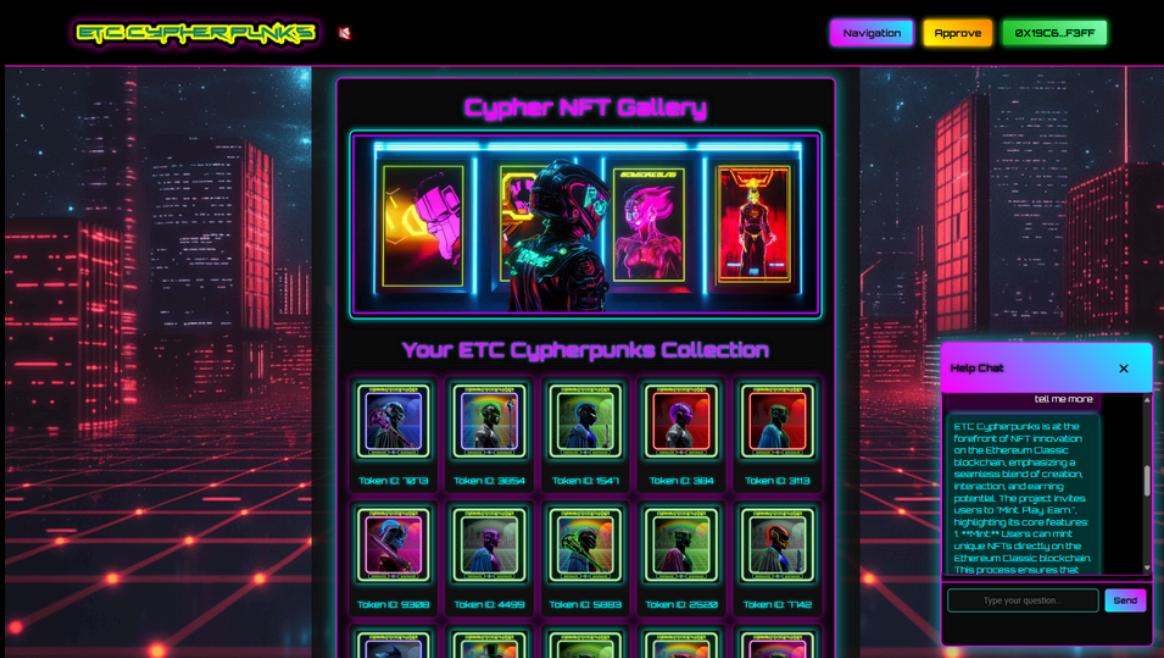

CUSTOM CYPHERPUNKS NFT GALLERY

Every collector deserves an immersive viewing experience.

ETC Cypherpunks features a custom-built NFT gallery where you can showcase and explore all your Cypherpunks NFTs in one beautiful, user-friendly interface. View your NFT collection at a glance.

Explore detailed traits, rarity, Cypher Scores, and unique lore backstories.

Easily share your collection and favorite NFTs with friends or the community.

FUTURE ROADMAP

We're just getting started. Expect continuous expansions:

Additional innovative Web3 games

More rewarding utility for the CYPHER token

Community-driven events, competitions, and expansions

Branded Merch and collectibles

Cypher Bot companions

Additional Cypherpunk universe expansions
